

ADMINISTRATION REPORT

OF THE

FOREST DEPARTMENT

OF

H. H. the Nizam's Dominions,

BY

F. A. LODGE, C. I. E.,

Inspector-General of Forests,

FOR THE

FASLI YEAR 1324.

(6th October 1914 to 6th October 1915 A. D.).

*(Forwarded with letter E. C. No. 269 of 1325 F. dated
24th March 1916.)*

(WITH THE ORDERS OF THE GOVERNMENT.)

SEUNDERABAD:

CHEEKOTY VEERUNNAH & SONS—GOVERNMENT PRINTERS.

1916.

Progress Report
OF
FOREST ADMINISTRATION
IN

His Highness the Nizam's Dominions.

For the year 1324 Fasli (7th October 1915 to 6th October 1916.)

CHAPTER I.

Introductory.

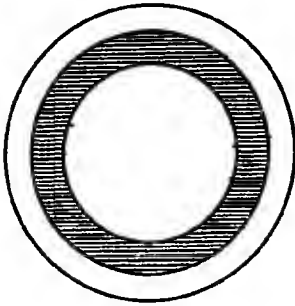

The Forests of Hyderabad State may be broadly described as varying from "good" in the east to "non-existent" in the west. A graphic section of the forest growth on a line from Mahadeopur to Aurangabad, or from Etur Nagaram to Raichur accompanied by graphs showing the density of population and area under cultivation on the same line or lines would illustrate nearly the whole history of the denudation and disappearance of forests in the one-sided and short-sighted endeavour to bring every possible acre under cultivation, regardless of the absolute necessity of a certain proportion of forest to the well-being of the ryot, the merchant and the town-dweller.

2. Even on the east there is no virgin forest, so the earliest stages of destruction of forest growth cannot be seen; the best of the teak, and probably of the rosewood has long since been removed, chiefly no doubt by floating down the Godavari, but sufficient immature timber remains to constitute a very valuable forest property which will in time yield first class teak and other timber fit for use in public buildings.

3. The destruction of forests proceeds in this way; at first in an undeveloped country there is too much forest and cultivators are offered inducements to fell it and open out the country for cultivation. For some time they obtain all the timber and fuel that they require from the areas they clear for cultivation, and they are also allowed grazing concessions for the few cattle they possess, in the adjoining forest. Presently, as the stock of timber and fuel on their putta lands becomes exhausted they begin to help themselves from the adjoining forests. Then perhaps a Forest Officer intervenes, and at once the ryots petition the Revenue authorities complaining that they are actually being asked to pay for timber and fuel which doesn't belong to them, and threatening to abandon their villages and their cultivation if this "injustice" is not put a stop to. This leads to an order laying down that ryots are entitled to help themselves to timber and fuel, and to graze a large number of cattle free of charge in the forests within their village—or taluk—or district limits. The forests are thought to be a never failing source of unlimited supply of wood and pasture whereas of course there is a limit to the amount of wood and pasture a forest can yield, just as much as there is a limit to the outturn of Jawari or any other crop on a given area of land.

As the villages grow, the forest in their immediate vicinity becomes poorer and poorer; over-grazed and over-cut it gradually disappears, and the villagers, now increased in number, have to go further a field for their wood, and to find grazing for their increased number of cattle.

4. The rate at which destruction proceeds is illustrated by the marginal 3 circles; the space between the outer and second circle is equal to the shaded space between the second and inner circle, and this is equal to the whole area of the inner circle; there are therefore three equal areas. Suppose the whole area of the figure to represent a forest, surrounded by villages; it is a large area, and the idea that allowing cattle to graze in and the villagers to help themselves to wood from the forest can ever exhaust it, seems to the layman absurd; but even the observant layman must admit that the forests do disappear in the vicinity of villages; supposing then that when the villages are small and just

beginning to grow it takes 40 years to destroy the outer circle of forests; with normal growth the villages will have doubled in size by this time, and the shaded circle (exactly the same area as the outer circle) will be destroyed in 20 years; if the villages have continued to grow the catastrophe is completed by the disappearance of the inner circle of forest (the same area as in each of the previous periods) in 10 years.

5. Every stage of this disappearance can be seen in the State, and the reason why it has been allowed to continue is because the concessions granted to ryots when it was desired to open out the country, have been continued to them after the country has been opened out, regardless of the fact that this means allowing the present generation of villagers to eat up the heritage of generations to come.

As soon as the necessity (if it ever existed) for giving concessions in forests in order to encourage the opening out of a country ceases all such concessions should be withdrawn; it is no doubt an outwardly cheap form of concession, costing the Government nothing in actual rupees and is therefore a popular manner of inducing cultivators to break up new lands, but in the long run it would be infinitely cheaper to the State to give the cultivators pecuniary assistance and make it clearly understood that the forests are under State cultivation, growing a crop of wood just as the ryot grows a crop of Jawari or chillies.

6. The smaller the forest area, the greater is the demand on it, and in the whole of the western part of the State the demand exceeds the supply, and yet this demand is to be met practically free of charge and free of interference by Forest Officers. Until these conditions are altered it is impossible to prevent the further deterioration and ultimate disappearance of the forests. The concessions of free removal of wood and free grazing must be heavily cut down, or better still entirely abolished; if the Revenue Officials are of opinion that the ryot cannot afford to pay for his wood and for grazing his cattle the obvious remedy is to decrease the land assessment, but in as much as there are huge tracts of country

where neither free wood nor free grazing are available, and where the ryots appear to prosper without these concessions, it is evident that the cry of the ryot who lives within reach of forest, that he will die of starvation if not allowed free wood and free grazing, is merely the cry of the spoilt child who will howl for sweets as long as he knows that he can get them by howling.

7. I have dwelt at some length on this subject of forest destruction by concessions because the whole question of protection and improvement of the State forests depends on these concessions being cancelled or at least limited to something less than the annual growth of each forest, and brought under rigid control. In the eastern districts the forest areas are still so extensive that I can secure sufficient forest for reservation free of all concessions, and leave out enough forest to serve temporarily for existing concessions if required, but in the western districts the position is hopeless. To quote one instance, the Rasnam reserve of 7,500 acres adjoins villages containing 1,000 houses; under existing rules 25,000 head of cattle may graze free (the pasture being insufficient for 2,500) $1,000 \times 365$ head loads of fuel and an unlimited quantity of gaireo timber may be removed free annually; in fuel alone the quantity amounts to 9,125 tons per annum, while the annual growth of the wood crop is at most 3,750 tons; the total standing crop may be roughly 50,000 tons, and a very simple sum in arithmetic will show that $50,000 + 3,750$ (annual growth)—9,125 repeated annually will result in extermination of the forest within ten years.

Constitution of State forests.

8. As stated last year there are no legally constituted "reserved forests" in the State, and as the revised Forest Act was not made law during the year the only progress made towards the creation of reserved forests was in the preparation of maps and boundary descriptions for forests to be reserved when the revised Act is passed.

Protected forests.

9. In the eastern circle the changes of area shown in form 2 are entirely due to alterations resulting from (1) exclusion of occupied lands by demarcation, (2) more correct calculations which become possible when the actual boundaries of forests are marked on the ground and plotted on maps. The figures are still liable to alteration, but are more correct than those given in former years.

The most important alterations are: *decreases* of 39,523 acres in Arsikota forest, 72,811 acres in Sirsilla forest and 31,869 acres in Wazirabad forest; in all three cases the areas previously shown included the occupied lands of villages forming enclosures in the forests:—*Increase* of 1,33,206 acres in Mahadeopur forests; this forest was shown as reduced by 131,125 acres in last year's report, as this area (approximately) was thrown out of the area proposed for reservation, but apparently the area remaining as forest is much more extensive than was estimated. The total estimated area of protected forest was 2,405,560 acres or 3,758.69 square miles at the close of the year.

10. In the Western Circle additions of 50,524 acres in Aurangabad Division were sanctioned during the year. The other changes shown in form 2 are due to the causes given under the Eastern Circle.

In last year's return the Kodamba forest in Sirpur taluka was erroneously shown as 6,400 acres in extent instead of 64,000; the area has now been calculated as 38,400 acres but this decrease of 25,600 acres appears in the returns as an increase of 32,000; consequently the total decrease of forest area in Adilabad district is actually 95,809 acres, although the returns show it as only 38,209 acres.

The most important item is the exclusion of 33,964 acres of the Utnoor forest to allow for extension of cultivation. The total estimated area of protected forest at close of the year was 21,96,548 acres or 3,432.10 square miles. For the whole State the protected area was 7,190.79 square miles against 7,226.21 square miles at the commencement of the year.

OPEN FORESTS.

Eastern Circle.

11. In the Karimnagar district numerous changes are shown; the old blocks have been broken up by the exclusion of villages and occupied lands, and more correct figures have been given for the balance remaining as forest; numerous new blocks of forest have been added to the list; these are mostly small blocks which will in time disappear from form 3, either by transfer to form 2, or by conversion into village forest, or by being given up for extension of cultivation.

Western Circle.

12. The figures for Lakshettipet Division have been reduced by over 50 per cent, as a result of obtaining information from the taluk offices. As stated last year the figures then given were very incorrect; the new figures more nearly represent the actual state of affairs. Heavy reductions have also been made in Gulburga Division.

The net result for the State is a decrease (on paper) of 465,111 acres of open forest.

The total area of State forest is at present:—

			Square Miles.
Protected forest	7,190.79
Open forest	3,571.68
Total	<u>10,762.47</u>

Showing a decrease of 762.16 square miles as compared with 1323 Fash.

DEMARICATION.

Eastern Circle.

13 The return in form 5 is still inexact, but the figures are slowly approaching a reliable estimate of the actual length of boundaries. Good progress was made in demarcation in all divisions except Khamamet where demarcation is said to be nearly complete. In Kareemnagar 209.14 miles of exterior and 70.02 miles of internal boundaries were cut, Nizamabad figures were 148.50 and 4.25 respectively and Nalgonda 111.13 and 116.87.

The total out-turn for the circle was 530.40 miles new exterior and 312.39 new internal boundaries cut, while 1,435.49 miles of existing lines were kept clear, the expenditure on new work amounted to Rs. 1,023-9-8 or Rs. 1.21 per mile. This exceedingly low figure is due partly to the existence of a custom by which the villagers clear the lines free of cost (generally an unsatisfactory arrangement leading to thefts of forest produce) and partly to the work done not having been fully paid for during the year. In addition to line cutting, 2,612 boundary pillars were erected.

Western Circle.

14. It is impossible to draw any correct inferences from the figures of expenditure for in some cases work done has not been paid for, and in others the payments made refer to last year's work; hence the apparent anomaly that in Boath Taluk, the maintenance of open lines cost more than the clearing of new lines.

In Aurangabad many of the boundary lines run over bare ground and little or no line clearing is required; boundary pillars have been erected along the lines. The length of boundary line in several cases has not yet been ascertained.

The total length of new work was 312.34 miles at a cost of Rs. 1,224-12-6 or Rs. 3.92 per mile, but as pointed out above the mileage cost is falsified by irregular payments.

15. The total length of boundary lines in the State was 5,589.93 miles of which 3,160.87 miles were cleared in previous years and 842.74 miles during the year under report. The out-turn for 1323 Faslî was 360.99 miles; there has therefore been a satisfactory increase in the out-turn, especially in the Eastern Circle. Delay still occurs in demarcation^{of} boundaries adjoining Jaghir and Makta estates, where boundary disputes are common and nothing can be done until the correct boundaries are fixed by the Revenue Department.

Forest Surveys.

16. The most important work of the year was the completion of the detailed survey of the Yellandu Forest. Nine Surveyors worked under the Superintendence of Mr. T. E. M. Claudius, who reports that they worked with zeal and efficiency; the drawing of the fair sheets on the scale of 2 inches = 1 mile was completed by the end of Maher, and the sheets are now being printed in the Forest Map Office of the Survey of India. The area surveyed is 626.5 square miles of which 446.2 square miles is actual forest, and this area will not have to be re-surveyed by the Survey of India on the $\frac{1}{2}$ inch scale. The cost of the special establishment including contingencies etc., was Rs. 27,829-15-6.

17. A surveyor was attached to every district except Nalgonda; details of the work done are not given in all the district reports; the best work was done in Nirmal where 33.74 square miles of forest were surveyed and mapped. In other districts useful work was carried out in the way of boundary surveys and preparation of forest maps by reduction from village maps.

CHAPTER II.

MANAGEMENT OF STATE FORESTS.

Regulation of Management.

1. Preparation and control of Working Plans.

18. Considerable progress was made in the direction of the preparation of simple working schemes.

In the *Eastern Circle* working schemes were prepared for portions of the Yellandu reserve (40 square miles) in and the Gubbagurti reserve (26 square miles) in Khamamett division; for the Manchippa and Rajipoor reserves of 52 and 16 square miles respectively, and for some blocks of open forests in Nizamabad; for the Jakkaram forests (26 square miles) of Hanamkonda division.

In the *Western Circle* a working scheme was prepared for the Chincholi reserve (about 13 square miles) in Nirmal division.

The Mahaboobnagar, Nalgonda and Lakshetipett Divisional Officers have not done much work in this direction.

19. No working Plans were in force in the *Eastern Circle* during the year. In the *Western Circle* fellings in Rasnam (Gulburga), Chincholi and Narsapur (Nirmal) working circles were carried out in accordance with the provisions of the working Plans.

2. Communications and buildings.

20. Very little road work is done departmentally at present, and such petty temporary repairs as were effected during the year were carried out by village labour, free of charge; no expenditure was incurred in either circle.

21. Both Conservators report that complaints regarding the faulty construction and leakiness of forest buildings erected by the Public Works Department were common; no new buildings were constructed during the year in the *Eastern Circle*; in the *Western Circle* the Divisional offices at Gulburga and Mahaboobnagar and the Ranger's office at Kinwat were completed during the year. The expenditure incurred by the Public Works Department as shown in Form 8 amounted to Rs. 10,175.

No repairs to buildings were carried out departmentally in the *Western Circle*, and only two in the *Eastern Circle*. The figures in Form 8 (a) received from the Conservator did not tally with those in Form 19; the reason apparently was that the former showed the amount actually disbursed, the latter the amount drawn from the Treasury for disbursement; the figures have been reconciled.

3. PROTECTION OF FORESTS.

(a) General Protection.

22. The number of cases pending, originating and disposed of during the year are shown in the following abstract:—

Circle.			Pending at commencement of year.	New cases of 1924 F.	Total.	Disposed of during 1924 F.	Pending at the end of 1924 F.
Eastern	2,184	2,327	4,511	2,810	1,701
Western	2,639	3,032	5,671	3,108	2,463
Total	4,723	5,359	10,082	5,918	4,164

There was a decrease in the number of new cases and a decrease in the number of cases disposed of, as compared with the previous year. The decrease in new cases (from 6,506 to 5,359) may be due to a good monsoon, or to demarcation of reserves or to the throwing large areas adjoining villages out of reserves; the Conservators make no remarks on this point.

The decrease in disposals (6,563 to 5,918) is the natural result of the decrease in new cases among which the major portion of the disposals take place; steps are being taken to withdraw the old long pending cases.

23. Details of the method of disposal of the forest cases are shown below:—

Circle.				Compounded.	Withdrawn.	Taken to court	
						Convicted.	Acquitted.
Eastern	2,648	157	4	1
Western	3,039	66	3	0

Compounding fees in the Eastern Circle amounted to Rs. 20,344-12-0 in the Western Circle to Rs. 15,810-1-7. The incidence per case was heavier in the Eastern than in the Western Circle, which is natural as the Eastern forests contain more valuable timber. The average incidence per case was Rs. 6-5-11.

(b) Protection from fire.

24. As reported last year, the only areas in which fire protection is properly carried out are the Ellapur and Singaram blocks in Warangal and Karcemnagar districts; both these areas were successfully protected at a lower cost than was incurred in the previous year; in Warangal the cost decreased from Rs. 10-14-0 to Rs. 8-11-0 per square mile and in Karcemnagar from Rs. 9-10-10 to Rs. 8-10-2.

In Nirmal division a fire broke out in a recently felled coupe and did much damage to the young shoots. The attempt to protect 8,250 acres without proper fire lines and patrols is misleading in its results under existing conditions, as no grass is left to burn by the beginning of the hot weather, except in the areas closed to grazing; the rest of the forest protects itself to a very great extent.

The ramnas in Gulbarga formerly shown as under fire protection have been omitted from the return as they never have been properly protected.

The establishment has on the whole been too busy with demarcation and other works to do much towards the extension of fire protection, but in Khammamet where demarcation is almost complete some progress in introducing fire protection should have been shown.

(c) Protection from cattle.

25. Out of a total of 7,190-79 square miles of protected forest only 40-24 square miles were closed to grazing during the whole year and 168-34 during part of the year, i.e., the fire season. The entirely closed areas are chiefly in Gulbarga division, and the closure is not effective.

With the above small exceptions all the protected and open forests were open to unlimited grazing. The percentage of entirely closed area to total protected forest area was 0.56, as compared with 17.21 per cent in Madras and 88.00 per cent in Assam.

26. The number of cattle grazed on payment cannot be accurately ascertained, because the grazing cess levied covers an indefinite number of cattle. The estimated numbers are:—

	1323 F.		1324 F.
Eastern Circle } 9,83,352	...	667,644	
Western Circle }	...	246,219	
<hr/>			
Total	913,863	

The revenue realised in each Division was as follows:—

		1323 F.	1324 F.	Difference.	
Eastern Circle.	Warangal	...	{ 48,323	{ —38,997	
	Khammett	...	{ 31,011		
	Kareemnagar	...	71,316	42,543	+ 28,773
	Nizamabad	...	34,194	46,489	+ 12,245
	Medak	...	99	14,909	+ 14,810
	Nalgonda	...	25,403	30,214	+ 4,811
Western Circle.	Lakshetipett	...	87,465	31,586	— 5,879
	Nirmal	...	27,795	23,989	— 3,806
	Mahaboobnagar	...	42,844	46,471	+ 3,627
	Aurangabad	...	10,583	9,812	— 771
	Gulbarga	...	4,172	4,453	+ 281
Total		...	3,67,202	3,29,750	— 37,452

A decrease was to be expected after the very large increase in 1323 Faslī; as Forest officers have no check on the collections of the cess by the Revenue Department it is impossible to give the exact cause of the decrease.

Free grazing.

27. The figures in Form 12 are valueless; equally correct figures would be obtained by multiplying the number of houses in the State by 25, as every householder is allowed to graze 25 head of cattle free.

4. SYLVICULTURE.

(a) *Natural reproduction.*

28. In the Eastern Circle excellent reproduction is reported from the Yellandu forests and the fire protected areas of Mahadeopur and Mulug. Elsewhere in the drier forests, the absence of seedling reproduction is very noticeable. In the Western Circle natural reproduction is said to be good everywhere, owing to the exceptionally good monsoon, but excessive grazing has done much damage to the young growth.

In both Circles, coppice growth in the coupes closed to grazing is reported to be excellent, but in Chincholi (Nirmal) 80 acres of coupe I, were burnt and the coppice growth was damaged. The burnt shoots ought to have been cut back at once, but this was not done, owing to ignorance on the part of the local subordinates.

(b) Artificial reproduction.

29. In Hanamkonda division an experimental teak plantation was commenced; seedlings raised in a nursery were planted out in patches near Pungadi stream in the Mulug block, and 1,200 seedlings are reported to be thriving.

The Aurangabad plantations are failures owing to various causes; the Inspector-General visited the Sadar Bazaar plantation at Jalna and found the growth very poor, due partly to imperfect protection against cattle, and partly to the plants being grass-bound. An experiment will be tried here, by allowing the ground to be cultivated for two or three years in order to get rid of the grass.

From Gulburga it is reported that the old plantations (scattered patches, covering 31 acres in all) are doing well.

5. EXPLOITATION.

(a) System of management.

30. In the Eastern Circle there are no areas under sanctioned working plans, and the policy followed has been to restrict miscellaneous fellings in the protected forests, meeting the local demands as much as possible from the open forests, and suppressing the demands of timber traders except in so far as they can be met from the areas excluded from reservation for the extension of cultivation. The fatal system of giving contractors permits to fell tens of thousands of poles over hundreds of thousands of acres has been entirely put a stop to, and for a time the supply of timber from the protected areas has been much decreased; as working plans are introduced the supply will increase again but it will be limited to the quantity which the forests can supply without deterioration, and if more timber is required locally it will have to be imported until the local forests have recovered from the many years over-felling to which they have been subjected.

31. In the Western Circle small areas are worked under working plans in Chincholi and Narsapur forests (Nirmal) in Karla forest (Aurangabad) and in Basnam forest (Gulburga). With these exceptions the remarks in the proceeding paragraph apply.

32. In both Circles the removal of gairee timber and fuel by ryots, free of charge, continued, but restrictions on these removals are being introduced in order to safeguard the forest growth.

Major forest produce.

33. Coppice fellings were carried out in the areas under working plans. These were the only systematic fellings made. In open forests large areas of forest thrown out for extension of cultivation were sold standing.

Minor produce.

34. The right to collect minor produce of various descriptions is auctioned annually.

Some of the ramnas in Aurangabad were taken over by the Revenue Department for the collection of a famine store of hay.

*(b) AGENCY OF EXPLOITATION.**(i) Government.*

35. The only departmental exploitation undertaken was in the Karla forest (Aurangabad) where a coupe of 100 acres was felled partly by contract and partly by daily labour when the contractor failed. The out-turn was divided into timber and fuel, the former being sold locally in the coupe, the latter removed to Nanded where a depot has been opened to meet the demand for fuel in the town.

The expenditure incurred amounted to Rs. 4,190; the receipts from sales to Rs. 8,675, while the stock in hand is valued at Rs. 2,720.

(ii) Purchasers.

36. The coupes in Nirmal and Gulburga divisions were sold standing to contractors. Areas set aside for extension of cultivation were similarly disposed of, but without the restrictions regarding method of felling and removal which are necessary in the case of areas to be maintained as forest. The local supply of Gairee timber and fuel was effected by the issue of permits, which as far as possible were restricted to the produce of open forests.

Permits were issued for grazing except in Aurangabad, where blocks of forest were sold to contractors who issued permits for the admission of unlimited numbers of cattle. This system leads to heavy over-grazing and is being put a stop to.

(c) Out-turn and sources of forest produce.

37. The following statement shows the outturn of forest produce removed by various agencies:—

Agency.	Timber.		Fuel.		Bamboos Value.		Minor produce including grazing	
	Eastern Circle.	Western Circle.	Eastern Circle.	Western Circle.	Eastern Circle.	Western Circle.	Eastern Circle.	Western Circle.
	c. ft.	c. ft.	c. ft.	c. ft.	Rs.	Rs.	Rs.	Rs.
1. Government	...	1,368	...	19,325	49	...
2. Purchasers	8,07,714	3,07,844	18,34,220	16,40,020	11,913	13,881	2,27,680	1,64,311
3. Right and privilege holders	1,28,274	1,14,093	155	7,770	2,292
4. Free grantees	...	474	2,800

Timber and fuel are shown in cubic feet, bamboos and minor produce in rupees.

Figures under items 3 and 4 are below the actuals as grants made by Revenue Officers are not included, no information regarding these grants having been received.

38. Adopting the form given last year the comparative outturn of timber from State forests of 1323 and 1324 is as follows :—

Reserved Timber.	1323 F.	1324 F.
Cubic feet ...	3,03,370	2,20,704
Running feet ...	12,61,874	3,37,825
Poles (No.) ...	8,65,862	3,74,322
Miscellaneous (No.)..	3,26,833	8,59,245
Gairee timber.		
Cubic feet ...	12,294	60,350
Running feet ...	75,985	19,400
Poles (No.) ...	80,497	71,000
Miscellaneous (No.)..	1,31,724	3,34,290

39. The increase in Gairee timber is due chiefly to sales of timber on Ijara and Putta lands. Moreover the figures are not absolutely reliable, some of them being merely estimates. The decrease under cubic and running feet and poles of reserved timber is due to the closing of the forests to unrestricted fellings. The increase under miscellaneous occurs chiefly in Nizamabad and Medak and has not been explained.

Fire-wood.

40. The outturn of fuel was :—

Eastern Circle...	92,718
Western Circle	1,21,093

Total 2,13,811 cart loads

against 2,45,197 of the previous year. Again it must be noted that the figures are not reliable; for example Gulbarga Division shows only 40 cart loads sold, but a revenue of Rs. 2,850 which is manifestly absurd.

Minor produce.

41. The outturn of bamboos according to Form 15 was represented by a revenue of Rs. 25,795 a decrease of nearly Rs. 12,248 on the previous year's figures. This decrease in outturn was expected owing to the extensive seeding of the bamboo, referred to in last year's report.

42. Grass and grazing realised Rs. 3,43,690 against Rs. 3,81,889 in the previous year, the figures for which were abnormally high. There is of course no record of the amount of grazing supplied.

43. The remaining items in Form 15 call for no special remark; the anticipated fall in revenue from leaves took place and may be considered permanent.

Rights and privileges.

44. Form 14 shows that 7,807 applications for agricultural implements, timber for house building and fuel were received and that the value of the produce for which permits were issued amounted to Rs. 53,587; in addition to this an enormous quantity of fuel and small timber is removed without the formality of obtaining a permit.

Free grants.

45. Free grants for special purposes were very sparingly made during the year, Form 14 (a) showing only 4 grants of a value of Rs. 123-8-8. This however is incorrect as it omits a large grant of timber by Government for the erection of a Leper Asylum in Nizamabad.

CHAPTER III.

FINANCIAL RESULTS.

Revenue.

46. The revenue accounts as rendered by Divisional Officers do not tally with the accounts as recorded in the Accountant General's Office; this is due chiefly to the fact that details of forest revenue collected by Revenue Officers are not communicated to Divisional Forest Officers. It is hoped that from 1325 Fasli onwards the accounts will coincide, but for 1324 only the accounts as rendered by Divisional Forest Officers are dealt with.

47. The gross revenue of the year amounted to Rs. 8,87,814; of this the Eastern Circle contributed Rs. 4,70,983 and the Western Circle Rs. 4,16,831. These figures represent only the revenue collected by Forest Officers. The Eastern Circle gives no figures for revenue collected by Revenue Officers; the Western Circle shows Rs. 23,409, but this figure refers only to the collections in parts of 3 Forest Divisions.

The revenue accrued in the following manner :—

	Eastern Circle.	Western Circle.	Total.
Major produce...	2,06,023	... 2,21,401	... 4,27,424
Minor produce...	2,39,643	... 1,78,192	... 4,17,835
Miscellaneous...	25,317	... 17,238	... 42,555
Total	... 4,70,983	... 4,16,831	... 8,87,814

Compared with the previous year the percentages are :—

	1323 F.	1324 F.
Major produce	... 6,21,688=55	... 4,27,424=48
Minor produce	... 4,67,767=41	... 4,17,835=47
Miscellaneous	... 42,108=4	... 42,555=5

48. There was a considerable decrease in the revenue both from major and minor produce; so far as *Major produce* is concerned the decrease is the result of the stoppage of indiscriminate felling in the protected forests and is a healthy sign. As regards *Minor produce* the revenue varies from year to year according to the crop and to the demand. The ebony leaf cigarette has been largely replaced by the cheap American cigarette; the war has affected the demand for tanning materials and other produce generally exported to Europe; the seeding of bamboos has diminished the available crop, and the stone quarries in Gulbarga division have been transferred to the Mining Department. In spite of these reasons for a fall in revenue, the revenue under this head is almost equal to that realised in 1323 Fasli, the figures for the last 3 years being :—

1322 Fasli.	1323 Fasli.	1324 Fasli
2,16,381	... 4,67,767	... 4,17,835

The revenue under *Miscellaneous* represents chiefly the sums received for compounding offences.

Expenditure.

49. The main heads of expenditure for 1323 and 1324 F. compare as shown below :—

	1323 F.		1324 F.
Conservancy and works	15,538	37,230
Establishment ...	273,952	...	342,244
Total ...	289,490	...	379,474

The increase under *Conservancy* is due partly to the departmental collection of fuel for Nanded town, partly to the increased expenditure on demarcation but chiefly to the cost of the special survey establishment which was employed throughout the year, against seven months in 1323 Fasli.

The increase under *Establishment* was due partly to the Conservator having drawn pay for the whole year, partly to promotions among superior officers and increase of subordinate establishment, partly to increased touring of officers and largely to the supply of uniforms to all Foresters and Guards.

50. The net financial results are :—

Revenue	8,87,814
Expenditure	3,79,474
Surplus	<u>5,08,340</u>

but to this must be added the revenue realised by the Revenue Department, details of which have not been supplied.

51. Form 20 is submitted as usual, though in its present form it serves no useful purpose; it will be modified in the 1325 return.

52. Form 21 shows the outstandings due to the Department and the progress made in collections. The total outstandings were reduced from Rs. 1,99,218 to Rs. 1,81,698 during the year.

As pointed out last year many of the old outstandings have been on the books for upwards of 30 years; of these Rs. 35,820 were written off during the year and Rs. 38,192 were recovered. The balance of old outstandings at the close of the year was Rs. 1,48,220. Of the current revenue Rs. 83,473 was not collected during the year and this is unsatisfactory. The worst districts were Mahahoonagar, Aurangabad and Karoomnagar. In Nirmal (Mr. Somvey) and Nalgonda (Mr. Abdur Rahim Shareef) the whole of the current revenue was collected.

53. No sums on account of "Dastgardan" or revenue payable to Jahagir estates, were on hand at the close of the year. This revenue collection is not in the hands of Forest Officers, but is shown in the accounts until refunded, as the authority of the Divisional Forest Officer to its repayment is required.

CHAPTER IV.

Administration.

54. Mr. F. A. Lodge, occupied the post of Conservator throughout the year, and toured through the most important of the Eastern forests, spending altogether 124 days in camp. The touring done by Divisional Officers was as follows :—

Name of Officer.	Division.	Days spent on tour.	Remarks.
Mr. R. C. Farrell	... Hanamkonda...	151	-
„ B. R. Aiengar	... Medak	67	Out of 176 days in charge.
„ K. G. Jawadekar	... Lakshetipett	15	Do. 84 do.
„ Mirza Md. Ali Beg	... Khammamett...	71	Do. 175 do.
„ Shriniwas Rao	... Gulburga	9	Do. 31 do.
„ Gopal Kishen Rao	... Gulburga	179	Do. 234 do.
„ F. C. Edwards	... Karsamnagar...	191	
„ Ahmed Mohiuddin Hus-saini.	... Nizamabad	254	
„ L. H. Somvey	... Nirmal	239	
„ Ghouse Mohinddin	... Mahaboobnagar	169	
„ Mirza Md. Ali	... Aurangabad	198	
„ G. S. Borde	... Lakshetipett	187	
„ Abdur Rahim	... Nirmal	13	Do. 51 do
„ Abdur Rahim Shareef.	Nalgonda	213	
„ Mirza Abbas Beg	... Medak.	175	Do. 189 do.

No explanation of the short touring done by Mr. Farrell and Mr. K. G. Jawadekar, is given. The touring of other officers was satisfactory. Messrs. Ahmed Mohiuddin Hussaini and L. H. Somvey were especially energetic.

No additions to the staff of Assistant Conservators was made during the year, but a reorganization scheme was sanctioned and brought into force from the 1st Azoor 1325 Fasli, it will therefore be dealt with in next year's report.

55. The following statement shows the periods of absence on leave of the Assistant and Sub-Assistant Conservators.

Name.	Grade.	Description of leave.	Total period of leave.	From.	To.
			M. Days		
Mr. K. G. Jawadekar ...	Asstt. Conservator, on Rs 350	Sick ..	9—5	{ 1st Azoor	6th Isfandar
„ Gopal Kishen Rao.	Asstt. Conservator, on Rs 300	Privilege ...	1—0	8th Far. ..	9th Mehr.
„ F. O. Edwards	Asstt. Conservator, on Rs. 300	Privilege ..	0—5	15th Thir..	14th Amr. "
„ L. H. Somvey	Asstt. Conservator, on Rs. 300	Privilege ..	1—20	13th Thir .	17th Thir.
„ Mirza Abbas Beg...	Sub-Assstt. Conservator, on Rs. 150	Privilege and sick.	3—22	10th Mehr	30th Aban.
				9th Khd. .	30th Aban.

56. Mr. Farrell did not put in sufficient camping during the year and his office returns were not up to date. He does not seem to have enough "push," though he thoroughly understands and carefully supervises the operations which he carries out personally.

Mr. K. G. Jawadekar suffered much from ill health, and it is doubtful whether he will ever be fit again for the hard life of a Divisional Forest Officer.

The three Oxford trained men, Messrs. B. R. Aiengar, Mirza Mahamed Ali Beg, and S. Hyder Hussain showed zeal, energy and knowledge; they all are still wanting in experience, as is only natural.

Mr. Gopal Kishen Rao, did a fair amount of touring, but his district has not made as much progress as was expected.

Mr. F. C. Edwards, showed some energy and interest in his work and made good progress in the selection of boundaries for reserved forests.

Mr. Ahmed Mohiuddin Hussaini, showed much energy and keenness; he is doing excellent work in several directions.

Mr. Somvey is an intelligent and hard-working officer but is inclined to be too easily discouraged; he has done good work in introducing and maintaining regular fellings near Nirmal, and in demarcation.

Mr. Ghose Mohiuddin, does not seem to have got a grip of the correct principles of forest management, and might with advantage show more energy.

Mr. Mirza Mahomed Ali, has done good work in Aurangabad; he is keen on his work, but suffers from having four districts to look after, instead of one.

Mr. Borde, has not shown much energy; although he was in charge of Lakshettipett for most of the year, very small progress was shown.

Mr. Abdur Rahim is on trial; he has still to show that he will make a capable and trustworthy Divisional Officer.

Mr. Abdur Rahim Shareef has the reputation of being a hard-working officer, but is wanting in technical knowledge.

57. Regarding subordinates, the only officers mentioned by the Conservator, Eastern Circle, for good work are Mr. K. Ramayah, Sub-Assistant Conservator and Hormnsjee, Ranger of Yellandu. The Conservator, Western Circle, had no personal experience of the subordinates of his circle and does not quote any remarks or recommendations of the Divisional Officers.

On the whole it may be said that in the past the time of subordinates has been too much taken up with the valuation and check of removal of trees on darkhast lands, and in consequence the protection of State forests has suffered and many of the subordinates do not understand their legitimate work.

58. The following statement shows the casualties and punishments of the year.—

—	Deaths.	Resignations.	Retirements.	Dismissals.	Reductions.	Suspensions.	Fines.
Rangers	1	1	3
Deputy Rangers	1	...	2	2	13
Foresters ...	1	2	...	1	4
Duffadars	1	3	5
Forest guards ...	5	15	4	55	89
Glorks	1	...	4	1	1	39
Menials	3	...	5	1	5	22

The punishment roll is very light and will probably increase as supervision improves.

Offices.

59. In the Conservator's Office Mr. Partridge continued to be of great assistance to the Conservator; he also did a certain amount of touring and inspected Mahaboobnagar and Nalgonda districts.

The Divisional Officers of the Eastern Circle report favourably on the work of their head clerks, but judging by results it seems that very few of the head clerks or accountants are fit for their posts. This is largely owing to the old system of recruitment and promotion under which an uneducated youth commencing life as a chaprassie might rise to the post of head clerk in the course of time. In order to obtain efficient office staff, certain educational qualifications must be insisted on in future.

CHAPTER V.

General Remarks.

60. In the preceding Chapters the Eastern and Western Circles have been dealt with as separate units although they actually only came into existence on the 1st Azoor 1325. This procedure has been adopted partly because the reports for the two circles were submitted separately by the Conservators, and partly to facilitate comparison when the report for 1325 Fasl is written.

61. The system of giving lands on putta inside reserves or rather proposed reserves, is being changed; the system now being introduced is based on the careful selection of areas to be reserved, inside the boundaries of which no lands shall be given on putta, and the withdrawal of all interference by Forest Officers with the grant of lands outside reserves as soon as selection of areas for reservation is completed. It will naturally be some years before selection of reserves throughout the State is complete, but the number of villages or even taluks in which the Forest Department will have nothing to say to the grant of putta for lands not included in selected and demarcated forests will increase annually and thereby the extension of cultivation will be facilitated, while Forest Officers will have more time to devote to their legitimate work of protecting, improving and working their forests.

62. For the year under report the usual statement of Forest lands applied for and given out for cultivation is as follows. The opening balances as reported by Conservators do not tally with the closing balances of 1323 Fasl:—

Items.	Circle.	No of Villages.	No. of Applicants.	Area in acres.	Value of timber recovered.	Remarks.
Applications pending disposal at the close of last year.	Eastern ..	680	1,517	75,715	...	
	Western ..	227	597	16,638	...	
Applications received during the year	Eastern ..	593	1,719	15,710	...	
	Western ..	891	2,875	75,963	...	
Applications sanctioned in protected Forests	Eastern	
	Western ..	9	79	1,279	195 9 6	
Applications sanctioned in open Forests	Eastern ..	451	733	16,397	3,820 0 0	
	Western ..	677	1,893	63,170	51,428 0 11	
Applications rejected after inspection	Eastern ..	179	1,022	9,446	...	
	Western ..	68	100	10,003	...	
Total applications disposed of	Eastern ..	630	1,735	25,541	...	
	Western ..	754	2,132	75,054	...	
Balance pending disposal at close of year.	Eastern ..	643	1,112	65,582	..	
	Western ..	364	1,140	20,547	..	

The decrease in *area* pending at the close of the year is satisfactory.

63. The revised Forest Act did not become law during the year, but was passed by a Revenue Committee, and introduced in the Legislative Council.

64. Steps were taken to fix a regular graded scale of establishment and sanction was received to the reorganization of the superior staff during the year; the reorganization of the subordinate staff was not sanctioned until after the close of the year, but the results of the year's work in this direction are that the Department now has a definite sanctioned scale of establishment from Inspector-General down to the lowest menial in a subordinate office.

65. As a result of being pilloried in last year's report there was a marked improvement in the punctuality of submission of Divisional Officers annual reports. The dates of receipts of the various reports were as follows:—

Date on which report was due = 1st Bahmon.

Name of Officer.	District	Date of receipt of complete report.	No. of days late.	Remarks.
Mr. Ghouse Mohiuddin...	Mahabubnagar.	10th Dai
" Gopal Kishen Rao ..	Gulbarga ..	16th do
" Abdul Rahim Shariff	Nalgonda ..	27th do.
" Ahmed Mohiuddin Hussaini	Nizamabad	29th do.
" Syed Hyder Hussain	Warangal	3rd Bahmon	..	2
" F. O. Edwards	Karimnagar ..	4th do.	..	3
" Mirza Mahomed Ali Beg	Khammamett	19th do	..	18
" G. S. Borde	Laksbetipett	22nd do.	..	21
" M. L. H. Somroy	Nizam	22nd do.	..	21
" Mirza Mohamed Ali	Aurangabad	27th do.	..	21
" B. R. Aiengar	Medak	7th Isfandar	..	36

I exonerate Mr. B. R. Aiengar from all blame, as he left Medak in order to take up the appointment of Personal Assistant to the Inspector-General on the 1st Azoor and had to write the annual report of Medak Division while working hard in a newly opened office in Hyderabad.

Conservator's report due on 1st Isfandar.

Name of Officer.	District.	Date of receipt of complete report.	No. of days late	Remarks.
Mr. E. A. Partridge	Eastern Circle...	22nd Isfandar ..	21
" R. C. Jarrell	Western do. ..	1st Ardibehisht,	60

Although Mr. Partridge's report was received only 21 days late, the various returns accompanying the report contained a mass of errors, whereas Mr. Farrell's figures were nearly all correct, but this is not an excuse for the great delay in the submission of the latter Officer's report.

F. LODGE.

Dated 24th March 1916. }
20th Ardibehisht 1325 I. }

INSPECTOR-GENERAL OF FORESTS,
